

Interactive seminar on 3D printing held

Chennai: An interactive seminar and demonstration on 3D printing technology was recently organised for college students at Loyola Institute of Technology by 'IONIC3DP', a Singapore-based innovative 3D printer company, in the city. The team presented merits and application of this birgeoning technology and roped in students across different engineering departments to make them aware of the functionality of the newly invented, user-friendly and cost effective 3D printer-version named 'KAPPA'.
