AUTHORS PROFILE

Dr. B. Narsimha is an Associate Professor and Head of Computer Science and Engineering Department, Holy Mary Institute of Technology (College of Engineering), Hyderabad, Telangana, India. He has been teaching and conducting research for past 18 years. He has published number of research papers in International/National Journals and conferences. His research areas include Database Management Systems, Data Mining, Big Data, Cloud Computing, Artificial Intelligence and Machine Learning.

Dr. S. Srinivas is an Associate Professor and Head of Data Science Department, Holy Mary Institute of Technology & Science (College of Engineering), Hyderabad, Telangana, India. He received doctorate from Sri Sateya Sai University of Technology and Medical Sciences, Madhya Pradesh. He had been in teaching and research for past 20 years. He has published number of research papers in International/National Journals and conferences. His research areas include Data Mining, Big Data, Cloud Computing, Artificial Intelligence, Machine Learning and Database Management Systems.

Dr. G. MANIKANDAN received the B.E degree in Computer Science & Engineering from Madras University, M.E degree in Computer Science & Engineering, Ph.D degree in Computer Science & Engineering from Sathyabama University, Post Graduate Diploma in Geo Spatial Information Technology and M.B.A degree in HR. He is having more than 23 years of Valuable in depth and extensive experience in Academics, Research & Development and Administration. He is currently working as a Professor and Head of Department of Computer Science and Engineering at Loyola Institute of Technology. His research areas include Research in the topic of "Enhanced AI Based machine learning model for an accurate segmentation and classification method", at Ton Duc Thang University (a public research university), VIETNAM. He is having more than six pattern and one Copyright on different topics. He has published more than 36 Research papers in various Journals and more than 32 Research papers presented in different National and international level Conferences. He has also completed more than ten AICTE / UGC Sponsored Faculty Development Programs. His area of interests includes data mining, Spatial Database, Geographic Information System and Intelligent Transportation Systems, Artificial Intelligence and Machine Learning.

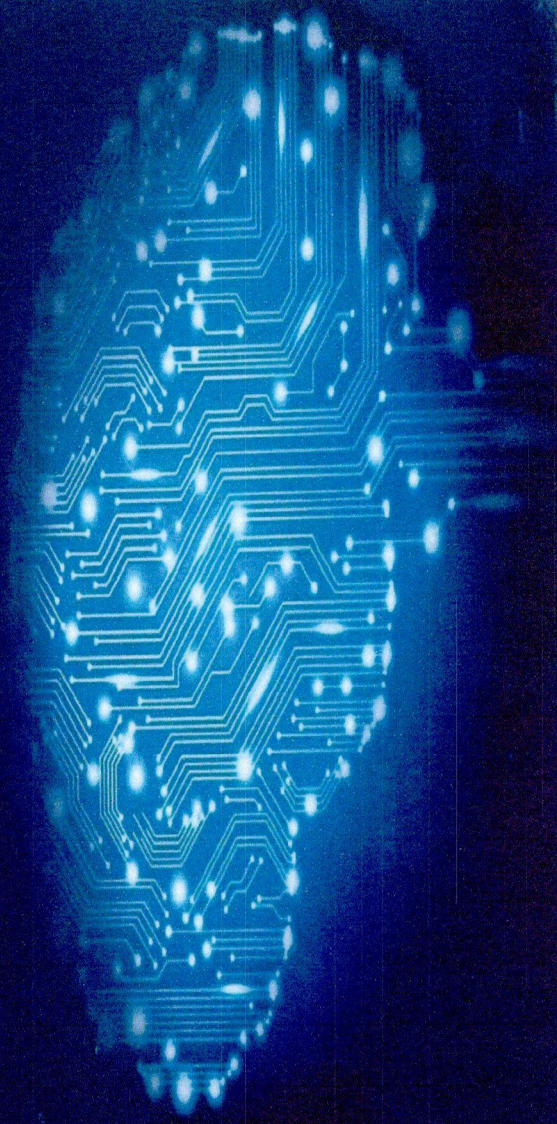

Dr. G. BHUVANESHWARI received the B.E degree in Computer Science & Engineering from Bharathidasan University, M.E degree in Computer Science & Engineering from Anna University, Ph.D degree in Computer Science & Engineering at Anna University. She is having more than 20 years of experience in Academics, Research & Development and Administration. She is currently working as a Professor and Head of the Computer Science and Engineering Department at Loyola Institute of Technology. She is having two Patents and one Copyright on various topics. She has published more than 15 Research papers in Scopus / ISI / IJIS Journals and more than 60 Research papers presented in different Conferences and Journals. Her area of interests includes Image Processing, Computer Vision, Data mining, Artificial Intelligence and Machine Learning.

About the Authors

Dr. G. MANIKANDAN received the B.E degree in Computer Science & Engineering from Madras University, M.E degree in Computer Science & Engineering, Ph.D degree in Computer Science & Engineering from Sathyabama University, Post Graduate Diploma in Geo Spatial Information Technology and M.B.A degree in HR. He is having more than 23 years of valuable in depth and extensive experience in Academics, Research & Development and Administration. He is currently working as a Professor and Head of the Information Technology Department of Kings Engineering College. He is doing Post-doctoral Research in the topic of "Enhanced AI Based machine learning model for an accurate segmentation and classification method", at Ton Duc Thang University (a public research university), VIETNAM. He is having more than six pattern and one Copyright on different topics. He has published more than 36 Research papers in various Journals and more than 32 Research papers presented in different National and International level Conferences. He has also completed more than ten AICTE / UGC Sponsored Faculty Development Programs. His area of interests includes Data mining, Spatial Databases, Geographic Information System and Intelligent Transportation Systems, Artificial Intelligence and Machine Learning.

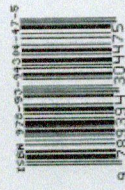

Dr. G. BHUVANESHWARI received the B.E degree in Computer Science & Engineering from Bharathidasan University, M.E degree in Computer Science & Engineering from Anna University, Ph.D degree in Computer Science & Engineering at Anna University. She is having more than 20 years of experience in Academics, Research & Development and Administration. She is currently working as a Professor and Head of the Computer Science and Engineering Department at Loyola Institute of Technology. She is having two Patents and one Copyright on various topics. She has published more than 15 Research papers in Scopus / SCI / WoS Journals and more than 20 Research papers presented in different National and International level Conferences. Her area of interests includes Image Processing, Computer Vision, Data mining, Artificial Intelligence and Machine Learning.

Renewable Energy Resources: Principle Of Heat Transfer

Dr. D. Sendil Kumar
Dr. Bryan Rithesh Miranda
Prof. Prasad G
Dr. V. L. Raja

FIRST EDITION

AGPH Books

About The Book

The environmental and economic significance of renewable energy supplies is rising rapidly worldwide. Governments throughout the world have officially acknowledged the financial viability of several renewable energy technologies and encouraged their citizens to invest in them. Numerous international organisations have launched comprehensive programmes to spread this innovation. Education in the field of renewable energy can lead to a multidisciplinary master's degree in science or engineering or it can be a supplementary focus area for students majoring in another discipline. This book serves both as an introduction text and a reference book for practising scientists and engineers who have not received useful training in renewable energy. Also, the book has a wider application than only academic institutions, since most practising engineers and scientists would not have received a broad training in renewable energy. The physical science theory is presented first in each chapter, followed by discussion of practical applications and new findings.
